Areas: Chatsworth Lake Manor, Box Canyon and Studio Road; Lobo, Triumfo and Latigo Canyons, Calabasas, Agoura and Malibu; Seminole Springs; Woosley Canyon Mobile Home Parks

General Information

I, the undersigned, have read and understand the [Digitron Acceptable Use Policy](#) (AUP) posted on the Digitron Wireless Internet Services web pages and I have read and understand the following information:

Weather, climate, terrain, buildings, trees, radio and television signals, etc. can and do have an effect on the availability and quality of wireless signals.

Installation requires an outdoor antenna, Cat5E network cable, POE indoor power supply and router (all equipment is property of Digitron). DCI cannot guarantee an indoor installation at any range.

For rented or leased location, landlord written authorization and consent is required and must be attached to this document.

Digitron (DCI) does not provide technical or other support for computers or computer networks and does not provide or install any computer related equipment with the exception of a DCI supplied broadband firewall/router.

Due to environmental conditions and bandwidth demand, Digitron does not guarantee minimum bandwidth speed. All broadband speeds indicated are synchronous.

A single workstation computer connection requires a 10/100 Ethernet network card (NIC) (not provided by DCI).

Customer computer must have a broadband firewall/router and current antivirus software. Digitron will supply a basic router at Customer's request for an additional \$25.00. Customer may use any router that meets DCI's specifications. If customer requires a wireless router for networking purposes an additional \$75.00 fee will apply if unit is supplied and installed by Digitron.

Digitron Wireless Internet Services, Costs and Conditions (place a ✓ in the appropriate boxes below):
